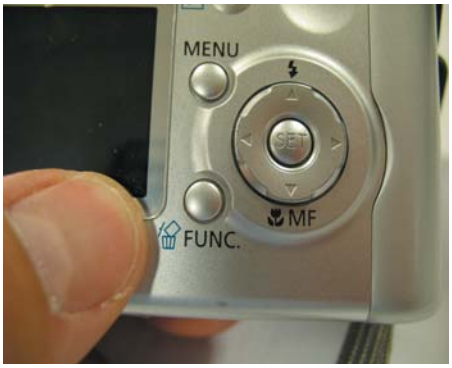
Recording Video for Tech Line

The Canon PowerShot A75 is the official camera for use at Honda dealerships around the country. To help ensure that your video is as clear and compact as possible for e-mailing, do this:

1. Turn on the camera.

2. Turn the shooting mode dial to the movie mode.

3. Push the FUNC button to enter the function mode.



4. Using the arrows, select the **320 x 240** resolution setting. (Your display should look similar to the one below.)

5. Push the FUNC button again to exit the function screen.

6. Press and release the shutter button to start recording, then press it again to stop.

NOTE: While recording, hold the camera steady or move it slowly.

If recording a noise, make sure the microphone opening is not obstructed. Your camera can be used in other resolutions, but for optimal performance and compatibility, you should use the 320x240 resolution setting. This setting allows about a 30-second video to be taken.

Remember that a 10-second video will take up about 3.1 MB of space, a 15-second video will take up about 4.8 MB of space, and a 20-second video will take up about 6.4 MB of space.

Tech Line's e-mail system will allow up to 10 MB (10,000 KB) of video to be sent in one transmission. If necessary, send your videos in separate e-mails.

Download the video to your computer the same way you download pictures. For more information, see steps 24 thru 32 of **INSPECTION PROCEDURE** in S/B 04-021, *Safety Recall: Automatic Transmission 2nd Gear Inspection.*

Send the video as an attachment including the VIN, the Tech Line reference number, your dealer number and name to: techline@ahm.honda.com
